WHY SHOULD I USE RIVAR?

Do you need scalplings, sand and cement?- We can supply it all. Please ask about our package deals

A couple of paving slabs broken in the pack? With our stock we would look to replace them quickly. You won't get that service from the internet!

A couple of slabs too riven or a colour not in keeping with the other? Bring it back to swap. You won't get that service from the internet.

How do you lay the slabs? Is there a pattern? Do I need to seal it? If you purchase from Rivar we are happy to discuss all these challenges.

Variation Within Natural Products

Part of the charm of natural stone is its variation of colour and shades even within one product type. Whilst every effort is made to ensure our brochures and displays are reflective of product colour and textures variations will occur. We cannot accept responsibility for any fault or impurities that may be present within a stone and any product should be examined before laying. We don't recommend natural paving slabs for driveways and do not accept responsibility for the cost to re-lay an area if a fault or impurity is found within a stone.
